ENENSYS awarded by Frost & Sullivan for the Global DVB-H Enabling Technology of Year 2007!

ENENSYS Technologies SA announced today that it has been awarded the 2007 Frost & Sullivan Award for the Global DVB-H Enabling Technology of the Year. For years, ENENSYS draws on the expertise of highly experienced people, designing those DVB-H robust equipments for Mobile TV broadcast that are deployed worldwide in highly demanding environments and transmission systems.

"An innate understanding of the DVB-H functionality since its evolution has made the company one of the leading experts on mobile TV, which holds a significant potential as the leader among emerging technologies," said Frost & Sullivan Research Analyst Bonnie Varghese K. "ENENSYS has gained considerable traction in the mobile TV broadcast market over the last few years and has developed a broad and comprehensive portfolio of products that make of ENENSYS the best partner in Mobile TV equipment providing."

ENENSYS DVB-H offering consists in the complete chain for DVB-H Mobile TV broadcast: Digital Turn Around products (demodulators, DVB-H + RF field test adapters), Head End products (DVB-H IP Encapsulator, SFN Adapter), IP Distribution products (MPEG2 over IP adapters) and Transmission products (DVB-H Modulators, Amplifiers).

"ENENSYS is honored to be recognized by Frost & Sullivan," said Régis LE ROUX, CEO of ENENSYS Technologies. "ENENSYS (ENd-to ENd SYStems): in the DVB-H market, stands out as the leading provider of complete DVB-H broadcast chains, from content aggregation to transmission, also with test & monitoring products. Over and above comprehensive DVB-H broadcast systems delivered as turnkey solutions, ENENSYS also provides or updates any part of the transmission chain, adapting interfaces with those required by the operator, and simply fit any kind of environment. As a matter of fact, ENENSYS solutions are flexible and expandable, enabling a single shot or a step-by-step move to DVB-H broadcast."

"To date, ENENSYS' DVB-H transmission products have taken advantage of an outstanding product mix and naturally migrated with the maturing DVB-H standard to fit broadcast applications, directly targeting telcos, broadcast and network operators," wrote Varghese. "These high-end products have been widely recognized by its competitors and customers alike. System integrators and DVB-H equipment providers are also proposing ENENSYS' equipment in their product list."

Frost & Sullivan Best Practices Awards recognize companies in a variety of regional and global markets for demonstrating outstanding achievement and superior performance in areas such as leadership, technological innovation, customer service, and strategic product development. Industry analysts compare market participants and measure performance through in-depth interviews, analysis, and extensive secondary research in order to identify best practices in the industry.
