Rugby World Cup 2007: live on DVB-H receivers!

ENENSYS and TF1 are proud to enable tomorrow's mobile TV during fall major sport event, and to show live leading edge technology.

ENENSYS, in partnership with TF1, French major service provider, is currently enabling live transmission of 2007 sport event, the Rugby World Cup! At TF1 premises, games starring the French Team, but also 1/4 finals, 1/2 finals and final, are watchable on latest generation DVB-H receivers (Samsung, Sagem).

ENENSYS was selected as the official supplier of transmission equipment: DVB-H Head End, TS over IP distribution solution and DVB-H transmission means. ENENSYS makes DVB-H transmission secure and fully ready for 2008 deployments.

" It is ideal for us to have French local partners working at the leading edge of DVB-H technologies, such as ENENSYS, and to run a live demo. All our guests were delighted to find out what DVB-H looks like and were very enthusiastic about images quality...» says Thomas Jacques, Director of Strategy and Technical Innovation at TF1 Group.

About ENENSYS Technologies SA

ENENSYS Technologies designs and manufactures innovative equipments for Digital TV transport over new media, from MPEG and IP oriented solutions to final content transmission (TV on Mobile content delivery). The major interoperability issues between content aggregation and live transmission are addressed by the comprehensive and consistent product line, targeting the Broadcast, R&D, Test and Field applications.

Covering more than 100 countries, ENENSYS has over 200 customers, including Broadcast Operators, Network Operators, Telcos, TV Channels Chipset Vendors, Set Top Boxes Manufacturers, Professional Equipment Manufacturers and System Integrators. ENENSYS already has set up partnerships with international representatives and technology partners which demonstrate the seamless integration of its products to complex platform.

Headquartered in Rennes, France, in the heart of the European Digital Broadcast Cluster, is publicly listed on Euronext Paris Stock Exchange (FR0010286252 – MLENS). For more information, please visit www.enensys.com
